# Triple M-SHARP Awards Ceremony

September 21, 2007

With nearly a century of forging excellence, Steel Industries Inc., an Ameriforge Group Inc. company, is a full service open die forging and seamless rolled ring manufacturer. The company is comprised of five operating facilities with offices, manufacturing and warehousing facilities located in Redford Township and Livonia, and employs a total of 198 employees.

Steel Industries is ISO 9001-2000 certified, and provides forged product solutions for the power generation, aerospace, industrial, oil and gas, mining, construction, and transportation industries.

Ameriforge Group is a manufacturer of forged products, dedicated to growing with select customers and suppliers through collaboration in process and technical innovation, applied to global markets. Ameriforge provides complete forged product solutions — fully integrating design, forging, heat-treating, precision machining, specialized welding, component assembly, and testing. The company serves a variety of markets and is organized into three market focused business segments, including (1) Connectors and Sealing Technology, (2) Power Generation and Aerospace, and (3) Transportation and Industrial.

# M-Sharp Description

# Agenda

## Michigan Safety & Health Achievement Recognition Program

The Michigan SHARP Program targets small, high-hazard employers—to help them develop, implement and continuously improve the effectiveness of their workplace safety and health management system. SHARP provides an incentive for employers to emphasize accident and illness prevention by anticipating problems, rather than simply reacting to them.

The MIOSHA Onsite Consultation Program within the Consultation Education and Training (CET) Division operates the Michigan SHARP Program. Onsite consultants work with employers to help them become self-sufficient in managing occupational safety and health. SHARP worksites earn an exemption from “programmed” MIOSHA inspections on a yearly basis.

The company’s safety and health management system incorporates each of the seven required elements: Hazard Anticipation and Detection; Hazard Prevention and Control; Planning and Evaluation; Administration and Supervision; Safety and Health Training; Management Leadership; and Employee Participation.

Today Steel Industries Inc., an Ameriforge Group Inc. company, received the prestigious SHARP Award for an exemplary safety and health management system at three of their facilities. Steel Industries is the first company in Michigan to receive SHARP Award recognition for three facilities at the same time.

The Michigan Occupational Safety and Health Administration (MIOSHA) established the Michigan Safety and Health Achievement Recognition Program (SHARP) Award to recognize employers that have achieved safety and health excellence far beyond their peers. The MIOSHA program is part of the Michigan Department of Labor & Economic Growth (DLEG).
